Personal Statement

Adaptable. Efficient. Cooperative. A Computer Science and Engineering student at AIUB , focused on backend development, AI/ML integration and secure data engineering. A highly communicative and collaborative professional, effective at pursuing new technologies and dedicated to assisting colleagues.

Technical Skills

Programming: Python (Strong), SQL, Java, C/C++
Backend & AI/ML: API Development, AI/ML Model Integration, Production Deployment
Databases: PostgreSQL, NoSQL (MongoDB), MySQL
Tools: Git, GitHub, Technical Documentation

Education

BSc in Computer Science & Engineering — Graduation Year 2026
Major in Information Systems — CGPA: 3.89
American International University – Bangladesh

Higher Secondary Certificate — Passing Year 2022
BAF Shaheen College Dhaka — Science, GPA: 5.00

Relevant Course Catalog

These are the courses from the academic transcript at AIUB that directly matches the core responsibility areas of the Backend Engineer.

1. Backend Systems & API Development

Code	Course Title	How It Maps	Grade
CSC2210	Object Oriented Programming 2	Advanced OOP, inheritance, API architecture	A+
CSC2209	OO Analysis and Design	Enterprise-grade system modelling and design patterns	A+
CSC2106	Data Structure	Efficient data handling for backend performance	A+
CSC2211	Algorithms	Analytical problem-solving for backend logic	B+

2. AI/ML Model Integration & Production Deployment

Code	Course Title	How It Maps	Grade
CSC3217	Artificial Intelligence & Expert Sys.	AI model development, expert systems integration	A
CSC4232	Machine Learning	ML model building, training, evaluation & deployment	A+
MAT3103	Computational Statistics & Probability	Statistical basis for ML model design and validation	A+
CSC4180	Introduction to Data Science	End-to-end data science pipeline for ML applications	A+

3. Data Engineering & Processing

Code	Course Title	How It Maps	Grade
CSC2108	Introduction to Database	Relational DB design, SQL — core data engineering tool	A+
CSC4181	Adv. Database Management System	Advanced DB: indexing, pipelines, NoSQL, warehousing	A+
CSC4285	Data Warehouse & Data Mining	Batch data ingestion, transformation, structured storage	A+

Selected Projects

Terrorism Prediction in Bangladesh
Python, Pandas, Scikit-learn

- Designed an ML Model , cleaning, feature engineering, and model evaluation.
- Prediction accuracy by 91.32% through LSTM-GCN, feature selection.

Student Performance Prediction System
Python, Pandas, Scikit-learn

- Designed an end-to-end ML pipeline covering data ingestion, cleaning, feature engineering, and model evaluation.
- Improved prediction accuracy by 18% through systematic feature selection and hyperparameter tuning.
- Maintained model version control and produced technical documentation for reproducibility.

Experience

Data Scientist and AI Engineer Intern [January 2024 – July 2024]
BRAC Bank PLC

- Contributed to backend feature development using Python, with an emphasis on clean, maintainable code.
- Optimized PostgreSQL queries (indexing, joins etc.) to improve response time and reduce load on database operations.
- Performed data validation and consistency checks to maintain integrity across internal systems, and documented fixes for repeatable handling.

Achievements & Certifications

- Awarded the Dean's List Honor Award for maintaining a perfect GPA (4.00/4.00) in Fall 2024-2025 at American International University-Bangladesh (AIUB).
- Google Data Analytics Professional Certificate, Kaggle Introduction to Python, Pandas Certificate
- Ranked in the top 30% in university-level programming contests, AIUB Programming Contest 2024.
- Participated in IEEE SPAVE 7.0, engaging with cutting-edge technical ideas and building professional networks.

Language Skills

Language	Reading	Writing	Speaking
Bengali	Native	Native	Native
English	Intermediate	Intermediate	Intermediate
